CRAFT CUSTOM

Stand out from the competition

Craft has developed functional sportswear for over 40 years. We work actively to understand the unique needs and requirements of our customers on all levels – from elite athletes to recreational enthusiasts.

Craft Custom offers you, your club or your company the opportunity to create unique training and competition clothing. Our designers produce customer-specific designs and help you customize a range that suits your needs. All our Craft Custom products have the same high quality as the regular Craft collection – perfect fit, efficient moisture transport and great freedom of movement.

Let's create a unique design for your club or company together. We will guide you through the entire process, and after your approval the design is sent to our factory for production

The design and production process

1. DESIGN CREATION

We are happy to help you create the best design for your club or company. In collaboration with the members on our graphic team, who will help you throughout the process, we will create your unique design.

Before we start, we need:

- Item number
- Design preferences
- Pantone colors info
- All graphic elements and logos in vectorized format: ai/eps/pdf

2. DESIGN APPROVAL

The first sketches are usually made on two garments (shirt and shorts, for example), which are sent to you for approval.

3. FITTING

The correct sizes are determined using fitting models.

3. SAMPLE PRODUCTION

Once the sketches are approved, a physical sample will be produced to ensure that the logos and colors are correct. These are sent to you for approval.

4. SAMPLE APPROVAL

If the samples are approved without changes, the design is transferred to the remaining items in the order and additional sketches are then sent for approval.

5. PRODUCTION

Once the final sketches of all products have been approved, the final order can be placed and the production can begin.

6. SPECIFICATION AND DELIVERY

Your salesperson, or the design & project manager, can give you more information about timeline and delivery options.

Purchase information

Everything you need to know to get the best out of your custom outfit.

Craft Custom works with a number of rules. These rules provide clarity for you and us throughout the entire process. Your design & project manager will be happy to personally explain these rules.

COSTS

The prices of all items are fixed. Which color or pattern you choose has no influence on the price. What you need to take into account are the fixed start-up costs. Start-up costs will be charged separately for each unique item number.

Would you like to go one step further in the design of your custom outfit? Various options are possible, often at a minimal additional cost per item. The additional options can be found in the catalogue and price list.

QUANTITIES

The minimum quantity for Craft Custom is 30 pieces per order, of which at least 10 pieces per item number. Please note that the items for women, men and juniors have their own unique item number.

If you order less than 10 pieces per item number, additional costs will be charged. For Bike, Run, Nordic Ski, and Triathlon:

1 - 2 pieces = 100% surcharge

3 - 4 pieces = 60% surcharge

5 - 9 pieces = 25% surcharge

If you order less than 10 pieces per item number, additional costs will be charged. For Teamwear:

1 - 2 pieces = 100% surcharge

3 - 4 pieces = 75% surcharge

5 - 9 pieces = 50% surcharge

RE-ORDERS

Craft Custom items can be re-ordered from 5 pieces per item number. If you place a repeat order within six months, the start-up costs per item for this order will be waived. For further conditions and costs we would like to refer you to our price list or the design & project managers of Make Your Own Design.

Fitting

An essential part for item and size selection

To perform optimally, the best clothing in the right size is a requirement. We therefore offer the option to try on the clothing before ordering. You can borrow the size range of an item from the Craft collection through your supplier. This means if you want to try on multiple items, multiple bags with size series are required. Please note that, for example, the jersey for women has a different item number than for men and that you request fitting models for both items.

Reserving a size series

The Craft bags with a series of sizes are lent out for a fixed period of up to 2 weeks. Please be aware that there may be a waiting list during peak season, so we advise you to reserve the item numbers you are interested in in a timely manner. The reservation, delivery and return of the bags is done via your supplier.

Lycra colorcard

To guarantee quality and functionality, the non-printable parts of some items are made of high-quality Lycra. This fabric is available in 16 colors so you can always create a beautiful combination that matches your design.

An additional charge applies for colors other than black.

Care instructions

To keep your Craft functional sportswear in great shape for a long time, it is important that it is well cared for. We advise the following to ensure a long lifespan of our high-quality fabrics, printing technology, and processing.

- Before use, we recommend washing the clothing by hand in cold water with a dash of cleaning vinegar to neutralize the inks so that they no longer bleed.
- Always follow the washing instructions as stated in the item. And very important, DO NOT use fabric softener when washing functional sportswear. The fabric softener forms a thin layer around the fibers, which reduces the functionality of the fabric (moisture transport, ventilation and, if present, water/wind repellent properties).
- Wash separately, not at temperatures above 30 degrees and preferably by hand as much as possible. Machine washing causes increased wear and fading of the colors. If you still want to wash in the machine, most machines have a special program for sportswear. The laundry is spun less hard, so that the shape of the clothing is better retained. Use mild detergents and avoid fabric softener and bleach.
- Wash inside out. Close the zippers and Velcro when you wash the clothes to prevent them from damaging the garment. Items with zippers and/or Velcro should preferably be washed in a laundry bag.
- Do not tumble dry. The elastic components cannot withstand the heat and will break off. Only allow the clothing to dry naturally and keep in mind that direct sunlight and heat can damage the fabrics.
- When hanging, be careful that the clothing does not stretch too much and lose its shape.
- Do not iron our products.

Use and general advice

- Do not put on our bib tights and bib shorts by stretching the suspenders or putting pressure on the stitches. Tighten carefully, section by section.
- Be careful when using saddles with embroidery/decorations. This can cause pilling. Such problems are not covered by the warranty.

Avoid deterioration of the quality of the fabrics

- Don't leave your sportswear in the laundry basket - wash them immediately after use. Perspiration can affect the color and fabric, making it thin and less elastic.
- It is better not to leave your sportswear in damp places or in plastic bags. Have the clothes become very dirty? Then use a detergent specifically for sportswear, which also combats unpleasant odors and is kind to the clothes.
- You can also soak it overnight in cold water with a dash of cleaning vinegar, Biotex, green soap or Vanish. Do not clean the clothes with a brush, this causes pilling and damage to the fabric.
- Massage creams or massage oils combined with sweat can damage the fabrics.
- Applying creams to pads causes damage.
- Avoid contact with Velcro fasteners as this can cause pilling.
- Wearing backpacks can cause friction and therefore damage the fabrics.

Infinity C1 pad

The patented Foam Cutting Technology (F.C.T.) is our latest laser-cutting technology. Traditional construction would create a stiff step between the two different areas but by using the F.C.T. we can remove unnecessary material in specific areas to obtain optimal performance and comfort at the same time.

To create a perfect anatomical shape, the side wings and front cup come with a bended design. The front cup also has a debossed area that increases the space for the genitals, decreasing blood pressure and the sense of fatigue.

The new C1 design allows us to work on two separate parts of foams that are cut and shaved independently. This procedure reduces the waste of shaved foam with approximately 25 to 30%.

C1 is available in three sizes – XS/S, M/L, XL/XXL – with different densities to satisfy any rider's unique demands and needs. The main dimension of the pad is the same for all sizes, but the construction foams have three different densities (pressure energy).

The top fabric is made from recycled polyamide.

DENSITY:
80/100/120 KG (depending on size)

THICKNESS:
SEAT AND FRONT: 14 mm

Infinity C2 pad

Infinity C2 comprises three layers, including a second and third layer made of medium-density and high-density foams. Together these two layers create a perfect combination that cushions and absorbs energy and then dissipate it like an anti-shock system. In addition, the layer closest to the skin is made of Italian top-quality polyester fabric that offers great 4-way stretch and excellent moisture transport. The fabric's 4-way elasticity allows the pad to follow the pedaling, moving body.

Infinity C3 pad

Infinity C3 is made from recycled polyamide that offers all the comfort and features that come with traditional high-quality polyamide. However, the yarn originates from flakes obtained by the PET grinding that are fused into chips and then becomes fibers and finally yarns. The result is a high-performing material with a green attitude. To enhance breathability, the pad's first layer has a perforated design.

The pad's high-quality foam is laser cut to ensure optimal comfort, support and leg movement. Furthermore, the laser-cut technology also allows the pad's layers to be firmly attached to each other without losing flexibility.

The new and improved C3 has a 3-dimensional shape with bended side wings to provide enhanced comfort during pedaling. The dimension is slightly bigger than the previous versions, offering larger contact area with the body. In addition, the new foam now has a higher density – 85 kg/m³ – to ensure exceptional comfort during longer rides.

Hawaii Pro Tri pad

Hawaii Pro Tri Pad offers great protection during intense workouts. It is designed to offer maximum performance in terms of protection, comfort and freedom of movement, thanks to minimal volume construction. It offers excellent comfort for both the male and female anatomy.

The Hawaii Tri Pad has a very lightweight construction with pre-molded wings and soft surface fabric dedicated to high-end and triathlon-specific products. It features a superfine polyamide techno fiber with jersey structure and hydrophilic characteristics. High breathability and quick-dry thanks to superfine microfiber fabric and perforated reticulated foam. This pad is ideal for cycling, running and swimming.

Face Mask

UNISEX

1911941

One size

Craft Face Mask features two fabric layers: the inner layer is made of a soft polyester and elastane fabric with mesh structure and a sanitized anti-bacterial treatment, whereas the outer layer is made of a water-repellent polyester fabric. In addition, the face mask features elastic ear straps for a flexible and secure fit. The result is a functional, elastic, and highly comfortable face mask for all-day use. By wearing a face mask you may reduce the amount of respiratory viruses potentially emitted through your breath.
